Who is currently the most powerful telepath of the world?

- Aluta loses all her telepathic powers due to the Fallen Mystic Realm as she ends up being a Mystic fighter in changing the name from Aluta to Brandy.
- Anjou entraps Meika Grey inside a killing machine from a future also known as Anjou 1206. Meika Grey is killed by Anjou 1206 with its killing machine guns. When Meika Grey is killed in action by Anjou 1206, Meika Grey's telepathy saves a life of Meika Grey in which is formed as a telepathic spirit that has been kept Meika Grey alive in a telepathic

form only. She might lose most of the telepathic powers after her body died as it ended with her brain.

- Ark Girl seems to have to keep the telepathy for a very long time. She does not show any power displays of her telepathy. She is a telepath. She seems not much of a powerful telepath. She is less powerful telepath than Meika, Manakin, Malakin, Roz, and Roc. She may be the least powerful telepath of the Corley sisters.
- Cat Grey had shown how powerful telepathic powers she used several times in her past when she was Cez. She stopped using a telepathic powers and might have to keep it a low profile. She has not lost her telepathy.
- Malkin has been changed since the Anjou 1206 war with the Zemo. She was probably almost killed and her powers were strained by the Anjou 1206. Her telepathy might have broken and fixed in which she could able to repair the damages of the telepathic powers. She is still a telepath who reveals that she did use a telepathic powers by creating things as an illusion by making the Zemo see something else.
- Manakin has been changed since Anjou 1206 war with the Zemo. She was probably almost getting killed and her powers were strained by Anjou 1206. Her telepathy seems not to be lost as she used her telepathy to mask the world that no one sees her and that she is assumably dead.
- Omen is a telepath unlike other telepaths. It has its natural telepathy that comes with her birth. It died a long time ago. It made pieces into something that is made of an omen. It needs a host to find its own real body in which it finds out her body were seemingly mutilated into pieces. It wanted its body as if it can make its body pieces altogether as if it can revive its own body yet. Amazingly, an omen still carries a telepathy in its spirit without a dead body.
- Psi is no longer a threat. Psi has the telepathy for years. Her telepathy is destroyed permanently. She is no more Psi. She goes by another name--Delphi. She seems to have somewhat of a little telepathy left. She lost all her telepathic powers permanently. She is no longer a telepath.
- Psychokite is a telepath in which she may be a very first telepath of all. She has shown how much powerful telepath she is as she stops Glory in which makes Glory is no match for her. She acknowledgment of Evil Spirit in which she must have known Joliet in the past. She is married to Quarrior as it means that she is very old. She is older than Meika Grey. Kite may be the most powerful telepath of the century or decade before she becomes Psychokite. Kite's body may have been wounded or left while she travels as a telepathic thing in the form of a spirit from air to air. Amazingly at how longest distance,

she is able to locate her body from a future dimension to the Earth as it shows how much powerful she can do with her telepathy.

- Psylanche is a telepath who creates a telepathic power bonded with a telekinetic power turn into a form of a weapon in which she can use its ability into creating a new weapon--a lance in which she named a lance-the lanche. She masked herself from the world as armored up in her form as well.
