The Hanna, the next agency of the ex-living lethal weapon programs is led by Cleodrina, is a very blurry future team.

Cleodrina
C.L.E.O.
C.L.E.O.D.R.I.N.A.
D.R.I.N.A.

The same genes and the works that scientist is working on an experiment patient Chameleon before in the list are:

1. Farah Harts' cryogenic ovarian eggs (at this time she is believed impregnable)
2. The secret scientific laboratory has been holding the cells (tubes) inside of failed and unfinished experiments
3. The hospital beds of the deformed unknown patients
4. The reptilian dnas and the glass cans inside of reptiles--mostly lizard kinds
5. The hazardous sign on the chamber says Terror Lizard.
6. The skin morphology and physiology files
7. The sign on the restricted containment area labels Chameleon with its warning words: Do not engage and do not touch.
8. The agency is branded the business by keeping it secret and has a name: Top Secret Special Organization.
9. The mystery agency is behind the whole thing and protected the whole secret facility and areas and has a name: Top Secret Agency.
10. The new generation of the agency has a name: Top Secret Special Service Operation.
11. The clones of Espio and their genes and powers extracted from Espio's mutant signature. Whether if Espio is actually a mutant or human before she was a baby, it still remains a mystery.
12. The death of a doctor and scientist reveals that he faked his death several times.

The Zemo has been unsuccessfully stopped the agency and the restricted area zones in which upsets Espio mostly. They assumes that the installment program is deadly thing and hardest to get or find to the Zemo. They ask Espio if she realizes that she is a killing machine network in the agency's best interest and a unique weapon in the doctor's and scientist's ultimate overachievement. It means Espio can not be stopped and killed by the world except the doctor.

Until the Zemo has the agency's the best group of high-level class agents, they started developing the new information about the development and investigating on a case for honorary member Espio even through they had been made a lot of attempts to get the hard copy. Vonnie Beckican and Joe Pal are nearest to the Top Secret Agency in which the Zemo tried to reach toward it. Farah and Jose Cadiz are closest to the head director of the Top Secret Special Organization.

Successfully, a director Hart has helped Espio look into a secret files at the database system in the Top Secret Special Organization and he has been known the histories and stories to the other agency when he was an agent of the Top Secret Agency and secret service agent as well. He finally mentions a doctor and scientist who is expert at manipulating and tricking when he was an agent as well. Espio asks the director the simple question about a doctor: Why did he willingly save me when I was a child? Director admits to her that he got a very rare advanced direct order from a mystery head of the directors behind the agency in which a doctor opposed and went rogue on his own and the area must be destroyed permanently.

Espio has growing the growth of learning about the doctor's involvement against the mystery head of the agency branches in which she should be dead not if it was for a doctor's action.

Espio has been learnt something about a doctors safety as a worker. She has wondered asking a director about his safety if he did not follow a chain of command and he told her that a head can not touch him unless a head finds a way to collect my head.

Esia Brook Jackson, a mystery alias under the agency who has expertises in chameleon. She is connected to a doctor.

Parson, an agent who guards Esia Jackson, is also connected to a doctor.

Veil and Panther, the mystery two agents reveal they have the powers just like Espio has, are only the carriers who has carries the genes of a chameleon.

Carpet, the one who has hid the 30 eggs and protected the hatchlings and the hatched eggs.

Agent Brady Linnaeus has given Espio a head up not to do the way she wants to do and informs her of the Chameleon.

Chamaeleo and Chamaeleon are the probably last generation of the Chameleon.

The new order of the advanced weapon program Squamata in its secret agency including Agent Brady Linnaeus.

Iguana, one of those agent of the new order, warns her of Iguania, a new suborder of a reptilian human race more dangerous than Espio's reptilian human mutant is. He explains that Iguania does not kill but has to do it if it is necessary. He tells Espio that she is an order of reptilian human race but she is a mutant in which makes her a very rare reptilian human race evolutionary.

Agent Fitzinger is a highly threatened agent who can kill any young female reptilian human who carries the genes of a chameleon. He has been trying to kill young Chale many times when he is interrupted and stopped by the mystery source. He is a very dangerous agent that can end the life of Chalemeon Shean. He must have killed too many young female agents for years.

Agent Qingo is believed killed by the agent Fitzinger. She secretly has succeed in a new evolution in which confuses him and makes him dismiss her as one of the targets. She has been around the Agamids and Iguanids by testing them if they can recognize her as a chameleon. She is coming after a doctor. She is a chameleonid in which no one reach to a new evolutionary of chameleonid unlikely Espio and Agent Fitzinger.

Fox Stuart has a zygodactyl feet in which shows he is different from the common and evolved chameleons has didactyly (five toes; not two). His codename is Zygo and later Rhamph.

Agent Ambia Nadzik, one of the Chewa tribe in Mozambique from Africa, kills Kamuzu in an order to become more advanced chameleon evolutionary and puts his cells in her into a singular form of two chameleon that carries a male gene to kill the young female chameleons in which advances her in the ability to kill all the men chameleons who killed young female chameleons. She can be a threat to Espio if Espio protect those male agents killed female agents.

Two new agents like Agent Ambia Nazdik has, named Alawi and Lissi. They are failed agents who messed the procedures and processings of the evolutionary stage like a successful agent like Nadzik. However, Bayli may be a new mystery source of both Alawi and Lissi in which kills them from devolved into their final stage, but they decide to share each other and merge into their shared cells in a final stage to survive the failed processings of the evolutionary.

Agent Willi Thoun discovers the deceased agents' remainings and learns that two died but something survives from merging the new cellular structures of two. He is killed by Bayli when Espio is coming to his secret base.

Agent Lanje Bohme a.k.a. Perinet, lives in a deep forest in Africa and is chasing Espio for murdering two African girls.

Glaw, a deadly Chameleon's claws, is successfully killed by Agent Yongia Ituri Nyiro, the one is married to Agent Tavet Boehme. Glaw killed a lot of chameleons in Africa.

Agent Yongia Ituri Nyiro is known as Oxyrhina and kills Glaw in an order to save Agent Lanje Bohme for her husband and encounters Espio in protecting Agent Lanje Bohme.

Agent Matschie Necas creates a strange chameleon killer named Xenorhina II after his codename Xenorhina in an order to kill Oxyrhina for mistakenly killing the Glaw and witness Espio killing Xenorhina II.

Agent Anang Dachner a.k.a. Horn, is close friend of Glaw and finds Glaw dead. She is a chameleon avenger who avenges the death of Glaw and finds the killer who killed the Glaw must be avenged.

Agent Mulya Nieden a.k.a. Hornless is the opposite of the Horn and can kill the Horn if she knows the advantages before Horn knows a new ability to kill Hornless to become a master of the Horns. She almost kills the Horn and is spared by the Horn, the one does not want to kill the Hornless. She is asked to be her partner to find a killer. Before Hornless is killed by Rugege, she gives the Horn a chance to retrieve something from Hornless to become a master of all the horns.

Rugege, an anti-chameleon militia army who eliminates all the chameleon agents and gets an order from a head of the agency in killing a doctor who created the very first Chameleon, shoots the Hornless with a non-ultraviolet lighted dark matter gun.

Agent Van Heygen, one of these anti-chameleon militia unit following Rugege for eliminating all the chameleons and opposing the leader of the anti-chameleon unity for capturing chameleons alive, wounds the Horn by protecting Rugege.

Macy Wiens, one kills most of anti-chameleon militia unit except Van Heygen, Rugene, and Geni, is known as Spinytail and one of these secret order under Iguana.

Rica Wieg, the one makes sure no one escape from Spinytail's massacre murders and has been following the very difficult trials of Geni, tries to find Geni and needs to kill her. She is also known as Cteno.

Xacana captures Rica and Geni in her territorial boundary as she dislikes them. She just need them for something she wanted for revenge against a doctor, agency, and unit. Xacana Clarki Krogh is one of these ex agents of the Top Secret Agency and one of these scientists of the T.S.A. She is former ex lover of a mystery doctor who creates the Chameleon.
