

A book of the Future Imperfects

Chapter 1--The Story of Jodie Kesser

--Few years ago, Jodie Kesser, a coward runaway and an unwanted hero, had a chance to find why she was here and decided to follow her father's words--Save your mom and give her a direct order to join the youth team. She was disgruntled and disappointed.

--A year ago, she became a Xiaman and played the role of a good hero. She had to challenge herself if see she can fight well and she had to learn the tactical plan for fighting. She was pushy and learning.

--A moment ago, she saw what happened so horribly. Everything had changed so suddenly. Most of her friends and allies are changed by the effects and causes of the broken and destroyed future. A virus destroyed the pagoda in China in which the Xiamen is formed by Gen and appointed and approved by the Zemo. It was destroyed. A future was gone. The name of a town and team is ceased to exist and disappeared.

Since a week, she has a chance to make a change in the plan for the better future. She changes her mind by not saving her mother and following her father's words. She knows that is not going to work if she does. She thinks maybe if she can stop a virus before it comes to the future worlds

Then she is confronted by the Planewalkers, the ones who gives her a warning if she dares to change a future and stop a virus from the beginning. They say if you pay the greatest price in an order to change the future and there would be dire consequences.

Now she is trapped with decision whether she has to abandon the people in another time or she has to find a better future coming while she can not change it.

Secretly, she tempts to change a future and knows that Rebsy can. She also knows that Graydon can do the two times at same time. She feels being offended by those who insulted her that she took advantage of the information of the past experienced experts.

Surprisingly, she tries her best to ease her former teammates from the horrible fights. She warns Kiki if she tries doing something and she'd die or screwed up for certain. She explains that Rebsy was the reason why we are here to see why she was like that and now I am her.

---Mimi: Jodie, the flash of a time would not do anything that stop me but you are something. You were there. You were more than a flash of a time. I saw you. I heard you calling my name before the blank comes.

---Jodie: That was the past. That was too much. It was horrendous. It was gone for good. But this can not be done like this. This virus is tiniest particle that can kill too many living things and even make a Earth sick. That is worse than that we had there.

--Trina: You sent me away here from there. That can not change what you did to me. This was the part of my life. That can not be fixed between us.

---Jodie: Trina, if I don't, you'll die worse either way there. There is nothing I could do about what I did. But I have a question for you: How the hell did you hide well from the future?

--Jendra interrupts and then says: Why not save the Little Cats before all that? So you knew before things happen.

Jodie: Not exactly. I do not know how to sense the future. I just knew when time came as things happened so fast.

Remy: Ridicilious! Jodie, you humiliated me.

Jodie: I am not. This is what all I got. I had no choice. Look at what happened to the Lost Trip and the Future Travelers. Then Zemo Monners. Then Little Cats. This is a chao.
