Graydon Pterdon asks one of his friend about needing a help and desperately needing to save his wife from an out of control line. One of his friends tell him she can not and will find someone who knows about lines and might save his wife. She tells Zeia that nobody finds the future person and needs someone to come, find him, and save his wife.

Leaving him in a time paradox for a very long time, she has not found any help or someone is a future type who has experiences about times, lines, dimensions, and future. He is stranded on this place a very long time.

A tablet lays along a text and a scroll. The word mentions the Demolation. Graydon Pterdon is one of them as well as his wife.

He is a scientist who studies the lines, time paradoxes, and anomalies in a despite of being a future alien from the future homeworld. He lacks an acknowledgment of the existence of the black materialism, possessions, entities, and anti-futurists. He knows an existence of Tyrannosaurus Rex and its tyrannies.

The Pterdon Family Lineage

- Abingdon Pterdon, the former member, protector, and guardian of the Future Homeworld and lines, keeps the straight line running forever as a power energy. He can not move and leave at his will.
- Lausanne, a wife of Abingdon, talks with her three sisters about how to get Abingdon out of the button. She realizes that there is nothing they can do about him.
- Linnahue, a wife of Graydon, goes psychotic due to an abnormality in the line of the future world and senses an abnormality in an anomaly. She tells him no one checks a problem in the future world and this line can destroy the Future World. A line-A is needed to fix or forced to be destroyed as she says. A line-A traps her through her power by affecting her more psychotic state of mind than she was. She dies with a line-A by sacrificing her own life in using her powers to destroy it with her.
- Graydon Pterdon, a son of Abingdon and Lausanne, can not let a wife go and develop an anger in him. When the destroyed line, he tries to grab her and touch something that becomes him of being a threat to the Future World.
- Corydon, a first son of Graydon and Linnahue Pterdon, carries a black materialism in him passing by his father and becomes a threat to the Future World. He is hidden away by his sister from the Future World races.
- Heather, a second children of Graydon and Linnahue Pterdon, becomes an agent of H.O.T. agency in which she finds his brother and hides him from the Future World.
- Blackdon, a last offspring of all the children of Graydon and Linnahue Pterdon, has no appearance of the black materialism in him.
- A blast from the past, Wendy and Langdon are their children of Graydon and Linnahue all before the children. They were dead.
- Rebsy, a daughter of Corydon and unknown wife, is working with her grandfather while Corydon is a fugitive and Heather is a hunter. She breaks free from her grandfather and meets the Earth.
- Dino, another child of Corydon and unknown wife, appears to face Rebsy while Corydon and Heather lands in the land of the Earth and meets the Zemo. He has a black materialism in him.
- Don, a last child of all the children, has no black materialism in him and saves a mystery girl on a gap between two futures.
- Evilyzer is a demon entity what is possessed Graydon Pterdon. A demon entity touches the deads back to alive as if that is what it is. Stirge is Langdon. She-Demon may be Wendy. Evily may be Linea. Shirley Lennox was also a part of it. Corydon was Evildoer. The whole team set is formed by Evilyzer.
- The X is a form of the blackness and darkness. X likes to keep it unknown and mystery.
- Graydon Pterdon is probably the most powerful future race of all the futurists and the Future World. He can use X and Evilyzer at same time. He is a time traveler and teleporter as well. He has too many power sets at one time.
- Evolyzer is more evolving futurist than the Evilyzer, a demon entity. He is the gray matter of the Future World. He is a mutant alien who has the power that futurists do not have where alien futurists originally have a normal future ability in the Future World.

- Tyrannt Rex, a villain of the Future World and a tyranny of the territorial nation in which is called the T'Rex from the Future World. He is faced by Abingdon, the one has the mightiest device to attempt to shock Tyrannt Rex before he sends Tyrannosaurus Rex and its pack. Tyranny Rex congratulates Tyrannt Rex for trapping Abingdon on a button in the place by making sure he can not able to defeat Tyrannt Rex.
- Graydon Pterdon's power sets are overwhelmingly powerful things that scare Tyranny Rex the hell out of it. Tyranny Rex tells his people that the one has multiplying times that we can not. A wife of Tyranny Rex finds a solution for making Graydon Pterdon disappear from the Future World.
- Rebsy Pterdon appears as if the Tyranny tries to make an alliance with Ptero and the Pteranodon while she is blending as a spy before Corydon and Heather takes her to Graydon's place for he safety only.
- Terror Lizards try to seize the Future World while Heather is summoned by the H.O.T. agency, the ones need to stop the Terror Lizards from crossing the Future World.
- After that, the whole family is gone and has not been on the Future World. A family is killed by the Terror Lizards and leaving their child behind. A child kills the Terror Lizards in any second before they reach the Future World with his mutant power. This child is later revealed to be Klaim, the one wants Rebsy dead and almost kills Glory, and is stopped by Nick.
- In the Pure Future World, the Pterdon family learns there are two Klaims--one from the Future World fighting the Terror Lixards for the whole time who just makes an entrance to a Pure Future World and other one appears to be a villain of the Xia and is little known to them. Klaim reveals that the other Klaim is either an alternative future or future in which a virus can destroy him if that is how he can not make it in his opinion and touches the other Klaim by learning that he is interrupted by a time into making him another one and becomes one for now.
- Klaim claims not to be what seems to be a person as if the part of game plays him wholly and reveals to be a true alien. Graydon amazes that Klaim is a futurist, once a mutant, and now an alien. He explains that Klaim is a key to genetic make-up comparison to the futurist.
