

# Episode 9: Can't Get Worse

*PhasoTech HQ*

Darius: You can't be serious, **Nublar?**. You're 100% sure it's not supposed to be Sorna?

Daniel: Oh yes, that's the authentic nublar

*Darius reaches onto the hologram, trying to spin it*

Daniel: Use your palms, open and close to zoom

*Darius turns the island, to see that it's the authentic*

*Daniel turns the island towards Camp Cretaceous, and zooms in on it*

Daniel: See?

Ben: But how-

Brooklyn: Exactly! It's been all over the news, Nublar was destroyed three years ago, completely obliterated, there's nothing left

Daniel: You see, that's where the lies begin

Daniel: The North side sustained the most damage, specifically the northeast corner, most of the island stayed intact, but smoke still appears all around the island, unable to escape from the air currents all circulating towards the island

Daniel: Maybe I shouldn't be saying this, but around a year or so before the eruption of Mount Sibot, PhasoTech had installed an observation plant and we also used some, *premium* materials, to deflect most of the imminent damage towards the north east, leaving most of the island safe, and from the looks of it, it worked, with the west, and most of the park actually surviving, the only thing we even found destroyed was the Jurassic Park visitor center (*As the observation facility is severely damaged by lava*)

Darius: About that, that was us.

Ben: But what are you even doing there on Nublar, all the creatures either drowned, or were fried

Daniel: But not on the south, those are the creatures we, experiment on,

Daniel: Feel free to do some research, you'll be staying here for quite a while

*The campers head towards one of the facility maps*

Alan: So... what's the best way to get out of here

Yasmina: There's a metro that gets us straight to the docks  
Sammy: Even better, we can take a cargo train  
Brooklyn: Yes! And it's not like they'll be transporting any  
creatures to nublur  
Ben: I hope

#### *World Map*

Samuel: I don't trust these guys whatsoever, something seems off  
Daniel: You're overestimating them  
Samuel: These kids lied about knowing your son, and then just  
casually almost had me killed in San Francisco without even  
beating an eye  
Daniel: They're cool

*Look over, the campers wave oddly*

Daniel: See?

#### *Facility map*

Darius: Hey, are there any other maps?  
Samuel: Not yet, but we have some specimen diagrams  
Darius, WHERE?  
Samuel: Down that hall over there, to the right of the elevators  
Daniel: *(mutters)* send security

*The campers walk, then enter an elevator door open without  
Daniel knowing*

*The doors begin to close*

Samuel: Hey! What do you think you're doing  
Darius: Escaping, what did you think?

*Doors fully close*

Samuel: How could you let this happen!  
Daniel: Me? You were the one who told them where it is

#### *Elevator*

Darius: So... where do we go now?  
Brooklyn: You're joking, right?  
Ben: I mean the one place they **would** expect us to go..

*Opens up to a cargo train*

Darius: This... THIS is your great idea

Ben: It's not the train, its where the train is taking us  
*The campers enter a car with only empty cages in it*

Sammy: Well this is trippy

*Darius closes the doors, and the train starts moving*

*Passenger Hub*

Daniel: Well what are you waiting for... go get them!

*Elevator doors close with Daniel on the inside*

*Daniel's Office*

*Daniel's feet on the windowsill, looking out towards the rock face which houses the Indoraptor*

Daniel: Come in

Samuel: We missed them, they're headed to west on the Blue line

*Daniel turns around, and shows his computer screen, with all of the metro station security cameras open*

Daniel: Are you 100% sure... you can't see very well in the metro... but you can very clearly see that there' no one... whatsoever, in the car

*Samuel looks in annoyance*

*Docks*

Brooklyn: Come on, any minute now, come-

*The cargo container starts shaking, and is lifted up into the air; the camera pans out of the container, and shows everything going on at the docks*

Darius: Well... this is a new experience

Alan: Lets just hope that we go unnoticed..

*Isla Nublar Lab*

Emergency Audio: Asset Out Of Containment, Evacuate Immediately,  
Asset Out Of Containment Evac-

*A Claw slashes at the speaker, and its ripped off, thrown to the ground, as screeching is heard, and glass shattering*

*Docks*

*The cargo container is dropped onto the ship, on the very top of a pile of four, inside framing*

Sammy: Hopefully we'll be taki-

*Horn*

Ben: Uhh... hope we take off soon

*All of the cranes and operators back up, as the ship debarks from the docks, they all turn around*

*Sammy testing the wal*

*1*

Sammy: Locked

Ben: And the other three?

*Sammy runs to each*

Sammy: Still locked

Yasmina: Look what I have!

*Takes out hand saw*

Darius: Why on earth do you have a handsaw

Yasmina: You know that those cars are construction... right?

Please tell me that you saw the orange construction hats in the car

*Flashback at Testing 2*

*Yasmina gets in the car before everyone else, and grabs the handsaw, putting it in a little pouch that she had all this time*

*Cargo Ship*

Alan: I mean truthfully, am I surprised?

Brooklyn: No, no you are not.

*Yasmina, with everyone else back, uses the handsaw to cut open the wall of the cargo container, only to see another wall, she completely cuts off the wall, and starts working on the other one, as the campers bend down in the back, covering their ears.*

Yasmina: Oh come on

*All turn*

Yasmina: Really, barbed fence, really?

Yasmina: I see cutting this not going well

Yasmina: But I'm pretty sure that these might help!

*Yasmina takes out small wire cutters from her pouch*

Darius: How... why... I-

Brooklyn: Don't ask, and let her do the cutting

*Shows Yasmina quickly cutting all of the wire*

Yasmina: I think we're done

*HQ*

Daniel: Samuel, they're not here

Samuel: Keep waiting

*Daniel shuts the computer screen*

Daniel: They're not, and spending hours **binge watching** the security cameras over a full hour is going to help

*Airplane loudly passes nearby*

Samuel: Well it was you-

Daniel: What? I can't hear you (*as sound dims*)

*Daniel looks up, and gets an idea*

Daniel: Where's that plane headed?

*Cargo Ship*

*All of the campers enter the next container; it's completely empty*

*Darius runs towards the wall, with everyone following him, and Darius pushes on the short-end door, it opens up over the very*

*edge of the boat, and Darius falls out of the boat, the campers grab him*

*Wheelhouse*

Helmsman 1: How long have we been on for?

Helmsman 2: Uhh, like five minutes, there's the shore right over there

*Helmsman look above as the campers pull darius up from out of the crate*

Helmsman 2: Should we deploy Methoxyflurane right about now?

Helmsman 1: Might as well

*Presses a red button*

*Sirens bare*

Brooklyn: Really.. really

Ben: You guys go, I got this

*All of the campers fall asleep, asides from Ben, who pulls Darius up, and closes the door,as even ben falls asleep due to the high intensity*

*Ben's eyes opening*

*Rain pouring outside and above the container*

*The others waking up*

Ship AI: Arriving at *Lima, Peru*, in two minutes

Ben: Well, I think I have an estimate of how long we've been away for

*Outside the container*

*The container opens up*

Ben reaches out of the door, trying to get on the pole of the other door

*Ben goes down the pole, as each of the campers leave the crate and onto another pole, as all the campers go around the boat, and see the sky rises of Lima, as **Lima, Peru**, appear on the screen*

*The campers run up the side of the ship, and then go up the stairs, into the wheelhouse*

*Ben pops the door open, hitting the two security guards, knocking them out. Darius sees a few compies on the ground, and him and alan shove the other two Helmsmen out of the boat*

*The boat is headed towards the pier, and Brooklyn, Yaz, and Sammy each turn the wheel away from the port in the middle of the storm, with it skimming the pier, and the Helmsmen and some of the compies*

*People Fleeing from the pier, as the boat aggressively turns away*

*Some of the cargo containers fall off of the boat, some onto the beach, and some onto the pier*

Darius: I think we lost some cargo

*HQ*

*Daniel wakes up out of his suite living quarters room*

Samuel (On Walkie-Talkie): Mr. Kon, we need you here NOW!

*Daniel puts on his shirt, and his suit, and walks out of the room, and closes the door*

*Daniel opens the door, onto the business investors meeting*

Investor 1: Daniel, how nice to see you, if only you weren't 10 minutes late

Daniel: My... apologies, sir

Investor 2: We've heard from an anonymous employee slash whistleblower of many of your creatures escaping, and you still refuse to reveal any of your plans up in the Americas

Daniel: Okay none of those "escapes" have occurred, ever, with the exception of one of the hybrids which was during a "testing" phase

Investor 3: And the San Francisco project?

Daniel: Again, I refuse to reveal any details on the project, other than what you already know... the grand opening is in less than 8 days

Investor 1: And we're supposed to feel confident that advertising... the second that it opens, is going to make any profit

Daniel: Yes... I feel confident, the day of and after, we have advertising teams all over the world setting up billboards, and releasing advertisements, organizing partnerships. This is going to be the biggest thing the world has seen since June 12, 2005. 98'120 visitors in a month at Jurassic World; make this 150'000 easy. It's in the heart of San Francisco, only sixteen miles from the Airport. Its a third of a mile long, with three parts, I mean it's literally heaven on earth, this thing is going to be above and beyond profitable

Investor 4: Okay then...

*Pacific Ocean, Just over one day later*

*The Cargo Ship pulls up to the former docks of Isla Nublar, with the farthest they can see; mount sibot, and the northern end, completely covered in ash*

*The campers jump off of the boat, and swim to shore.*

*They see two women exit from a building, chatting.*

*The campers land on the beach, and sneak up, and try to remain hidden.*

Sabrina: Oh, by the way Theresa, did you see that new paper that Turner published? It's really a. great one, if only hers from 2013 hadn't got so much wrong! But I mean what hasn't changed, Spinosaurus got a rework, and then that just simply odd stegou-. Theresa: Uhh... Sabrina (*Points towards the campers*).

*Sabrina turns her head and drops her coffee*

*In a room near the docks*

Sabrina (Voiced by Haylet Atwell): What in heaven's name are you six doing here? And is that... famous Archaeologist and survivor of J-.

Alan: Yes, it's me.

Theresa (Voiced by Elisabeth Olsen): No, really, what are you doing here? And how did you even know that this place wasn't burned to smithereens.

Darius: It's... a long story.

Brooklyn: Basically, we were investigating a weird building and managed to get on a plane somehow, and landed in Chile, where we were hunted for a whole day, discovered this place, got on a boat, destroyed a pier in Lima, and landed here.

Ben: Incredibly short version.

Sabrina: Well, uhh, that explains most of it

Theresa: And wouldn't you mind introducing yourselves, we see new people maybe once a month for a few minutes...

Darius: I'm Darius Bowman

Ben: Benjamin Fitzgerald Pincus

Yasmina: Yasmina: Fadoula

Sammy: Sammy Gutierrez

Alan: Alan Grant, "Famous archaeologist and survivor of Jurassic Park."

Theresa: And You?

Brooklyn: Brooklyn

*Theresa looks awkwardly*

Sabrina: Theresa?

Theresa: And... do you have a last name?

Brooklyn: Usually people associate me with bad people, as I assume you have, and you're right, my last name is Steingarden, Steingarden, no shame, I'm a Steingarden

Sabrina: No problem, MantahCorp isn't exactly viewed positively around these parts, but there are worse things around here than someone bearing the last name of Steingarden

Brooklyn: Okay...

Sabrina: Just put on a lab coat

*All campers wearing a lab coat*

Sabrina: We have multiple species undergoing testing here, and some more, uhh, disturbing things down here, on Nublar, but you might want to head somewhere else first

*Boarding the helicopter*

Theresa: On Nublar, for what wasn't destroyed, we were more or less able to get rid of most of the lava flows on the west, we haven't even started tackling the east. What we were able to do on the south and west was basically get a bunch of the trees from islands near, and Costa Rica, as well as in Colombia, and from other projects in the region, and plant them all across the island, we quite literally restored an ecosystem from a volcanic eruption, with many of the native species from Sorna, Muerta, Matanceros, Pena, and,

Sabrina: Tacaño

Sabrina: Nature wanted the dinosaurs off of the island, same with the people, in a way, some of us believe that the volcano was nature's last resort to balancing the ecosystem, it couldn't fix, so it had to destroy it

Theresa: From the looks of it, we're passing the lava wall, protects the ecosystem from any small eruptions.

Alan: I already see that this is an awful idea, right from the start

*Helicopter flying over Mount Sibou, as it lands on one of the cliffs*

*All leave the helicopter*

Darius: What the heck is this place?

Theresa: Observation facility, monitors any Seismological activity, the UN actually uses this facility

Sabrina: You might want to see this

*All walk into the elevator, and the door closes with a ding*

*Door opens at the sky observatory*

Yasmina: Well now I definitely have a fear of heights

Brooklyn: Guys, look!

*Points to the old Camp Cretaceous*

Ben: Do either of you have binoculars?

Theresa: Always

*Sammy looks through binoculars at Camp Cretaceous, in the corner of her eye she sees Daniel Kon's penthouse*

Sammy: Really! That place really couldn't have gotten hit by a rock or something?

Alan: Calm down, it's just a camp

Sammy: No, not that, THAT

*Points towards Daniel's penthouse*

Sabrina: Oh, that bastard's penthouse. He actually comes to visit sometimes, whether he actually goes into the penthouse or just stares at it in glamor even I don't know?

Yasmina: Well, I have no clue what to do about that

*Daniel's Office*

Samuel: Well that went absolutely splendid!

Daniel: I know right? Maybe they'll invest some more! If we get even 150'000 guests a month, and they're all kids tickets, that's already 13.95 Million dollars, at the low end. if they're

a third adults, a third seniors, and a third kids, then 35'325'000. The power of Family tickets. I would assume maybe closer to 20 Million in the first month because you need 5 people to get a Family ticket. Maybe we should change to 4, do you-

Samuel : For the love of god I was joking. With no advertising, this is going to fail, and you know what? Everything you've done in the past three days has failed miserably, Capturing the Scorpions, Fixing the Aviary, Fixing Testing 2, Keeping INR-1 Content, and not to mention Capturing those campers

Daniel: Excuse me? That's not my fault, a lot of people need more training, and higher pay, apparently

Samuel: And who's fault is that?

Daniel: Well not mine!

Samuel: Not to mention you also let those campers completely free, they could be headed absolutely anywhere, San Francisco, Venice, Hong Kong, Manila, Islamabad, Bogota, San Jose, **Anywhere**

Daniel: And? It's not like we can fall... we have the biggest reveal ever in seven days, and nothing can stop us, period

Samuel: Lets see.

*Isla Nublar Observatory*

*All in elevator*

Yasmina: So, I've said this like a million times, but where now?

Sabrina: I was personally thinking maybe we should show you the old main street, we were planning on re-

*Elevator shakes*

Theresa: Oh no...

Ben: What now?

Theresa: A tremor. These happen every week or so... and we've been quite overdue

Brooklyn: So Sibos is erupting again?

Sabrina: No, not by a long shot, but a **lot** of lava is dispersed all around the volcano, we have to clear premises past the lava wall within 5 minutes of the first tremor

*Shakes again as the elevator opens*

*All run out and get to the helicopter. They get in , and take off, as the helicopter shakes, and almost falls*

*The helicopter finally gets into the air successfully, as they hear a screech come from somewhere in the forest*

Yasmina: What the heck is that?

Theresa: Oh no... this is very bad

Sammy: Worse than the tremor?

Sabrina: Much worse, one of the hybrids has escaped

Darius: Hybrids... Really... Even more hybrids?

*In the forest*

*The Hybrid, when hearing the tremor, goes from hunting a deer with its claws, to turning its head, to running towards the wall, and then attempting to scale it, to run back, all from the perspective of its eyes*

*Helicopter*

Darius: But really... another one, you had to go make another one?

Theresa: Uhh, we didn't make this one, nor any of the other ones on Nublar

Sabrina: We found these other ones roaming around Cryogenically. When we first arrived here when we lost word of those hunters on-

Ben: Wait YOU sent Mitch and Tiff?

Theresa: You think that some indie-hunters actually owned that kind of a yacht? We funded everything, even the camera guy, but he didn't actually work for us, if I'm not mistaken, Wilson found him as a homeless man on the streets of LA

Sabrina: Back on the topic of hybrids, We found this one in about February of 2016, alongside the others. We had to implant more batteries on the island, for around four years to be exact. We don't know how, likely by the Compies or something, *Project E-750* was released, with the other five, *W-600*, *A-055*, *N-061*, *J-936*, and *P-812* Those, those were, the failed ones, they didn't turn out well, whatsoever. Basically, the Scorpions technically was the first, but that's only the top of the iceberg. The other 3 were thought dead, but Wu, as expected, cryogenically froze the creatures again, and we brought them to PhasoTech to study... then back here, and last tremor, they escaped, and we haven't been able to find it yet, even after a full 10 days, nothing

Pilot: So are we headed to the Main Street or not?

Theresa: Nope, We're just gonna miss out on this incredible opportunity

Pilot: Great! (*unamused*)

*Helicopter lands on the control center, and they all leave*

*They all look out, and Darius looks out towards the ocean*

Darius: How long has that canal been there for?

Sabrina: Long enough. We built it here over the course of a few months in 2016. Luckily, it was completed just days before the cyclone, and when Mills' crew and Wu arrived

Ben: Wait, Wu was with you?

Theresa: Oh no, he is easily persuaded by money, he did alot of work for MantahCorp though, Mills changed sides to Mantah also, and since the whole project was secret, not to mention, illegal, he switched before pay day, and we couldn't tell anyone

Alan: Well, they do have a history of blackmailing people Sabrina? Uhh?

Sammy: My family, when they thought I was dead along with the rest of my family, getting nothing, they destroyed my family farm, and turned it into a factory.

Theresa: Well that is truly awful. Soda? (Opens the door).

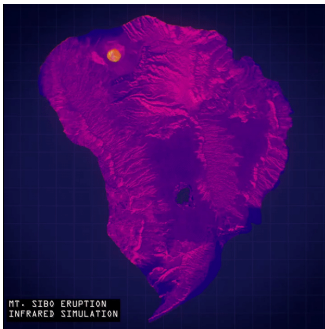

*In the genetics lab*

Darius: Geez, you guys have really spruced this place up, but do you really even own it?

Theresa: As a matter of fact, yes. Masrani sold it to us in the face of lawsuits, needed money, badly

Sabrina: Anyone interested in seeing a 2.5d representation of the eruption

Ben: Okay...

Sabrina shows on a model on the screen on the wall; proving that the eruption barely touched the south

Darius: So... you say that the shields worked?

Sabrina: They're not shields, but you also can't see the part on the north. Absolutely pelted, everything south had surprisingly minimal damage

Agent 1: Freeze!

Theresa: What is this?

Agent 1: You have six random people under private property

Theresa: Excuse me? I take massive offense, these are my actual friends from HQ in Chile

Agent 1: And their badges?

*Foot Stomps*

Darius: Ahh, must of left them on the boat, do you know if those ones have left or not?

*Shows another one of the hybrids with a thick skull "revving up". It starts running as Sabrina, Theresa, and the campers look oddly, with the security guard not noticing, as the Hybrid runs right into the guard, impaling him, hiding the blood*

Ben: Well, that's just gruesome

Theresa: I know exactly what to do

*Runs to the hologram, with the same creatures as in Jurassic World, except with the 5 hybrids added*

Theresa: which one, which one (as the hybrid turns around again)

*Theresa presses a button, and the well known Stegoceratops*

*The hybrid turns around and goes to bite the creature, as its jaws pass right through the hologram, and the campers run out, as Ben and Sammy bar the doors, locking the hybrid back inside*

*Snarl from all corners, as the Velociraptors appear*

*Yasmina jolts awake*

Ben: Yaz: you okay?

Yaz: Better than ever, why?

Darius: Guys... you might want to see this

*Cuts to Black*

*Credits Roll*

*Post Credits Scene:*

*Shot pans over Isla Nublar, as more smoke comes out of the Volcano, for the first time in a long while, and another tremor ravages the island. The shot zooms into the Observation facility, as it crumbles into the lava, and the camera zooms down to the forest once again, and a horrifying shriek reveals itself*
