

Episode 7: The Waiting Game

Alan: What? I'm in my beach house in Angeles? What are you talking about "Kenji's friends"? I've never met a Kenji in my life

Daniel: Real smooth dr. Grant. Maybe you should've shut **MY** curtains, I just saw a thalassodromeus fly out of both mine and yours. You have two minutes until security arrives, so you might as well just-

All seven campers run with the computer

Daniel: Oh come on

Daius: Brooklyn? Can you get into the elevator details?

Brooklyn: Watch and learn

Brooklyn grabs the computer and opens up an application, and calls an elevator for every floor in which is in between the security guards and the campers

Elevator 1 (With elevator music)

Security Guard 1: Uhh why are the lights all yellow now

Security Guard 2: I don't know. They usually act up

Security Guard 1: Please don't stop, please don't stop

Security Guard 3: Great, you just jinxed us, get out and call another one

All get out at Floor 4 (Main entrance)

Floor 18

Alan: Call the other one

Brooklyn: Did you really think I didn't think this through?

Elevator 2 opens up in front of them

Darius: So where to now?

Yasmina: Where have we **not** been?

Ben: I saw a dome of some sorts north of the genetics lab when we were there

Yasmina: Another testing paddock. There's a metro car which heads there

Sammy: So what are we waiting for? (*Presses the button to go to floor 11 (Passenger Hub)*)

Elevator music as seven dings! For each of the floors, exit at floor 11

Brooklyn: Says on the board one should arrive in... one minute

Darius: Let's hope those security guards don't arrive

Sammy: Hey! Vending machine

Runs off

Ben: I'll go also... kinda could go for a chocolate bar right about now

Goes off to the vending machine

Ben: Sammy?

Sammy: Yes?

Ben: What exactly did Mantah tell you to do on Nublar?

Sammy: That's... an odd question. They told me to get the data off of Wu's computer, all of it, DNA samples of a Velociraptor, and infiltrate and try and get the samples from the Indominus. Oddly they couldn't get wu to do it hi-

Sammy: Wait... why are you asking

Ben: My parents have been acting weirdly, and I'm hearing the word "Phantom" more than I care to... and Phantom, Phaso?

Sammy: I mean the fact that people are that despicable is unsurprising... but I hope sincerely that that's not the case

Tracks

Darius: What's that thudding sound?

Yasmina: It sounds like walking up stairs

Brooklyn: Oh no...

Brooklyn (*Yelling*) Guys get over here NOW!

Security guards pop out of door

Security Guard 3: Hands Up NOW!

Metro pulls up

Darius: Get in, get in, GET IN!

Brooklyn: Don't let them in!

One guard gets his arm into the car, Brooklyn pushes his arm out

Metro AI: Next Station: Genetics Lab

Ben: Look what I got!

Pulls carob bars and crab juice out of bag

Brooklyn (*In Sing-Songy voice*) Nostalgia!

Alan: What?

Darius: You missed it. The day Jurassic World shut down, Ben brought some on the monorail. The same day that he fell.

Sammy: Well atleast that can't happen again

Doors Open, and Ben falls onto the pavement

Security Guard 4: Got you now

Security guards grab Ben, Ben holds onto the door

Ben: Oh come on!

Metro AI: Next Station: Docks

Brooklyn wedges herself in between the doors as Darius grabs Ben, saved from the security guards

Yasmina: Uhh... guys? Daniel just sent "I can see where you're headed :wink" and This is saying we're headed to the docks. Should I change course?

Brooklyn: Might as well

Yasmina changes course then hides the IP of the computer, realizing what samuel did

Alan: So... what exactly happened the moment that ben fell

Darius (*As clips from Last Day of Camp play*): Ben was trying to switch the track to avert a train. He had to climb onto the roof to get into the cabin. He did so and we praised him. Just as a Pteranodon grabbed him and we-

Metro AI: Final Station: Testing facility 2

Ben: Here we go

Cuts to Daniel's office

Samuel knocking on Daniel's door

Daniel: Come in Sam

Samuel enters

Daniel: So what happened. Please tell me that they got them.

Samuel: Unfortunately... no, we did not

Daniel: You've got to be joking. Where next

Samuel: Docks presumably. They're on a blue line train.

Daniel: I have an idea. Note this down. If we lockdown docks and genetics lab stations, they'll be forced to stop downstairs, where we can have all of the guards here!

Samuel: Sir you genius! I'll inform security

Samuel leaves the room

Testing Facility 2

The campers leave the metro, and walk up a flight of stairs, only to end up in an observatory, with many different species, as the Entering BioSyn soundtrack plays

Pterodactylus slams its head on the window

Sammy: Well that's just awkward

Brooklyn: Darius, what can you see?

Darius: Pterodactylus, Maisaura of some sorts. Stegosaurus, maybe a Styracosaurus?

Yasmina: So what now? How do we get home and what do we even do?

Ben: Off topic, but I mean **IF** we can find a way to shut down operations than that would be optimal

Yasmina: To do that... we would need a map and a clearer indication of what to do

Sammy: Speaking of clearer

Points to a viewing dome in the center of the paddock

HQ

Samuel: Brenner get squad D down here now! This is an emergency.

Samuel: Brenner!

Security Guard 3: Mr. Wilson, there's nothing headed here on the blue line

Samuel: Ha Ha very funny Styles

Security Guard 3: No look! There's two yellow and zero blue!

Samuel: Oh my god!

Testing facility 2 Observation Dome

Alan: See anything else?

Darius: This is just... incredible! They've recreated the early cretaceous Kem Kem beds in the middle of a modern day desert! It's just insane!

Brooklyn: Yaz! I think I found a facility map!

Yasmina grabs a map off of a frame, it's a facility map

Ben: Lets see what they have here (As he looks at an interactive screen)

Swipes through Maiasaura, Pterodactylus, Dilophosaurus, Dracorex, Suchomimus, Styracosaurus, Scorpions Rex, Stegosaurus

Ben: Wait, what was that one

Swipes back one, to the Scorpions Rex

Ben: Oh no, no, no, no, no, this is really bad, we have to get out of here

Sammy: Ben? Is everything all right?

Ben: Look at the creature

Sammy shrieks

Alan: Sammy?

Ben: No time, we have to go now!

Brooklyn: I don't get it, why do we have to go?

Darius: Is everything all right?

Yasmina: Okay what is happening here

For the first time in six years, the campers here the deafening screech of the one and only, Scorpions Rex

They all turn around, and see the scorpions rex climbing onto the glass dome, only to try and pierce its thumb through it

Its thumb pierces the glass, and it starts cracking. The Scorpions then eyes the campers,

Brooklyn: Run

All the campers run through the hyperloop back to the edge.

Darius: Split up! It'll have a harder time finding us that way!

The campers split up, confusing the scorpions

The Scorpions turns around, and climbs out of the hyperloop from the central observatory

Ben: Phew! Its gone

Alan: I'd suggest to not look up right about now, and to just run to the edge

Artificial rain starts pouring, and the scorpions rex roars in fury

Yasmina: Go Now!!!

HQ

Samuel: My god! Get one of these yellow lines over onto the Blue NOW!
Daniel begins conversing through Walkie-Talkie

Daniel: Samuel it's been seven minutes how have these pests not arrived yet

Samuel: It appears that they changed the track of the train

Daniel: So where are they headed

Samuel: It appears that they're headed to testing one. Maybe to try and break out the indo raptor

Daniel: You genius! You'll keep us one step ahead of them!

Daniel: Get team 6 on all edges of Testing ONE!

Testing Facility 1

Troops are deployed all around the facility waiting for the campers

Testing Facility 2

Campers silently tip-toeing to the edge as the scorpions rex violently roars. By the time it hears something, the campers are long gone, walking up the stairs

Darius: Okay now that I can be in shock once again... what in the heck is that thing doing here?

Brooklyn: It's not just me that saw 1 and 3 die on Muerta right? And we know for a fact that 2 is dead!

Yasmina: If they managed to clone another indo raptor, then what's saying that they didn't manage to clone another scorpions rex

Ben: I mean... what **is** to say that they didn't, Two companies have already made one

Brooklyn: No, my granddad didn't make any, he only found the third and first ones

Darius: So basically Phaso cloned another one and we have two apex predators within a few miles of each other

Yasmina: Precisely

HQ

Samuel: Brenner do you copy?

Security Guard 7: Yes

Samuel: Have those pests arrived yet?

Security guard 7: No, not yet

Samuel: How did they-. Oh NO No No!!!!!!

Security guard 7: What's happening?

Samuel: These kids are at testing 2!

Security guard 7: On my way, over and out

Testing facility 2

Darius: So what do we do now? This thing knows we're here so we have to go

Yasmina: I have an idea

Yasmina: Ben, head to the garage on the map and get out three vehicles

Shows ben opening the garage

Yasmina: Brooklyn and Alan: Home in onto the walkie talkie channels to see if you can hear Samuel and the other security guards

Brooklyn and Alan testing the walkie-talkies for a signal

Yasmina: Darius, Me, and Sammy will do some tracking to see where they are

Yasmina, Darius, and Sammy looking on the computer for the security guards

Ben: Get in, get in, get in!

Brooklyn: We have to go now! They know we're here!

Yasmina: Ben and Sammy, you two go in that one. Brooklyn and alan in there, Darius and me can go in this one

Tires Revving

The campers start driving to HQ

Testing 1 Metro Station

Security Guard 7: Well? Get in! If we don't find these kids then who knows what Samuel and mr. kon are going to do

All get in

Shows a pan over the metro line

The security guards get out at Testing 2

The security guards walk up the stairs only to see that the glass of the observatory is completely broken; something has escaped.

On the way to HQ

Sammy: So what now? We've found a bunch of creatures, but how do we know their endgame?

Ben: Well, there's one place we haven't been yet... the aviary.

Brooklyn: I am **NOT** risking my life over some stupid birds.

Darius: I think you're the only one.

Pans over to the aviary

Several pterodactylus are feeding

Some Anurognathus' are drinking water and socializing

The Anurognathus' turn around, only to see a massive hole in the side of the aviary

They all hear a deafening roar

Screen goes black
