

Episode 6: First Encounters

Note: From now on, PhasoTech CEO will be renamed to his actual name; Daniel (Kon). Pilot from episode 4 will be renamed Dylan (Baker)

Chile, Genetics Lab

Darius: Yaz? What the heck are you doing here?

Sammy: And how in god's green earth did you even get here

Yasmina: It's... complicated

Brooklyn: But we were talking to you about... eighteen hours ago

Yasmina: Well... you can do the math on that one

Darius counts, and sighs

Alan: So... how?

Next portion is narrated, so Yasmina will occasionally have Narrator in Parentheses

The Day Before

Yasmina: Well... What do we have here?

Focuses on the private taxi-way. Yasmina sees Samuel

Yasmina Walks down the stairs of the observation tower, and watches Samuel from behind a wall

Samuel: Bring the Companies, Thalassos, Stegos, and Styracosaurus over today, and bring the rest of the carnivores over tomorrow, we need more time with these ones

*PhasoTech employee walks to the crane to pick up the crate
Yasmina runs to the crate, opens it up, and here's the squeaks of companies*

Samuel looks over, yasmina closes the crate

Yasmina: Come on, good companies

*Samuel talks outside, yasmina ducks behind a hay bale
Samuel opens the crate up, momentarily, and closes it
Companies continue squeaking*

Samuel: Can't these things just shut up for TWENTY seconds
Yasmina (whispers) apparently not

Crane picks the crate up, puts it on a truck, which is loaded up onto the airplane

Yasmina: Really, they're really taking me on the plane. They couldn't take me to the building

Yasmina: I've GOT to get out of this

Yasmina hears the doors of the plane close

Yasmina: Oh come on

Cockpit of the plane

Dylan: All systems activated

Samuel: Deploy Methoxyflurane, or wait?

Dylan: Might as well now

Back of the Plane

Light beeps, knockout gas appears

Yasmina grabs an oxygen mask

Plane starts increasing speed, yasmina falls back onto some poles

Yasmina: **Ow!**

*Roar comes from behind her, as a Carnotaurus rises, only to fall
Yasmina goes to adjust her mask... as she realizes that its off*

Screen cuts to black

Chile

Darius: So what happened after that, it's not like you just found yourself here

Back on the plane

Yasmina: Where am I

Door begins opening

Yasmina: Really, this really

Yasmina slides down, tries to grab on, but only reaches at the end. The crates for the dinosaurs barely pass over her head, she sees the carnotaurus shrieking as it falls

Yasmina grabs back onto the plane, grabs a parachute, and waits to jump. She jumps and aims to the main building, and sees the campers near the Indoraptor exhibit, she yells to no avail

Parachute deploys over the building, she gets up, and heads to the emergency escape from the helipad

Yasmina finds a map on the wall.

Yasmina: Oh my god, this is it! This is what all the maps are showing, I know this place like the back of my hand

Yasmina: Come on, Main transit, Cargo docks, cargo aviary, passenger Laboratory... Passenger Laboratory!

Yasmina presses the button on the elevator, and heads down, no one enters the elevator

Yasmina walks out, and sees on the schedule, the metro arriving in twenty seconds. She looks around, and sees it. She enters the metro and sits,

Samuel runs out of another elevator yelling "wait", and enters, yasmina ducks under a seat... under the exact one that Samuel ends up sitting in

Metro AI: Next Station - Laboratory, arriving in Fifteen seconds

Samuel gets up, and yasmina gets up from under the seat, and looks out the window, knowing she can't get out

Samuel leaves the metro car, and talks with Daniel as seen previously, from Yasmina's perspective.

Yasmina hears the train doors close, but Samuel and Daniel do not, the train departs,

Yasmina thinks about who Daniel may be... she gets up and arrives at the Genetics lab

She exits the train, and heads to the main entrance, the campers nowhere in sight, though she saw them there less than ten minutes earlier

She wanders around for a few minutes... and hears Samuel and Daniel, walking, and follows them

The elevator door opens, and Yasmina watches, and then the final moments of episode 5 unfold once again

Present

Yasmina: So that's how I managed to get here

Ben: So after all that did you atleast see anything in San Francisco that we didn't.

Yasmina: Nothing, although I know the guy's full name is Daniel Kon

Brooklyn: I recognize the last name, but I don't know where its from
Darius: Me too

Sammy: Who did we know with that last name, if we all knew them

Darius: Couldn't be that Ken guy that I heard about, he started with a W. Couldn't be the guy from Jurassic Kingdom, he was "Drax". We never even knew Mitch and Tiff's last names, nor Dave and Roxie. Hawkes and the other mercs either, so that leaves...

Alan: Kenji

Ben: Kenji Kon, surprised he never told us his whole name, asides from a few times

Yasmina: We should... go... just so that they don't wake up again

Later,

Daniel and Samuel wake up

Daniel: What in the heck happened to you

Samuel: What happened to me? What happened to you, you knocked your head onto mine, right after these kids are, oh, i don't know, your literal **son's** best friends.

Daniel: Oh I'm sorry that we were knocked together. Yes, blame it on the boss, as usual. But how did they even manage to get here

Samuel: How am I supposed to know that, I was on the- I was on the plane, the one that landed a half hour ago

Daniel: Come on samuel, next time, actually investigate the plane, we don't need any unwanted visitors

Headed back to the metro station

Darius: So what do we do now, we've found that they have a bunch of dinosaurs, and a building in San Francisco... Do we just head back?

Brooklyn: Nu-uh, there's so much that might be left, heck, there's even an AVIARY

Sammy, looks like... the blue line to head to HQ

All enter a train to head to HQ

Darius: So... just look around?

Sammy: Precisely

Yasmina: I think I know what we can do

Cuts to All in front of a computer

Yasmina: I would assume Masrani gave you an Email when you decided to endorse the park... right?

Alan: Yes, I'll log onto it

Alan logs onto his MasraniGlobal email... it still works

Yasmina, now type what I say. First do an EMail to DanielK1@PhasoTech.com. I saw his email in the control room. Now say that you heard of what they were doing through some people, and that you want to video-chat with him for his channel, although it depends if he saw you, I didn't see you when they confronted you... so I would assume he didn't

Brooklyn: Real smooth yaz, real smooth

Alan: Sent

Daniel's Office, five floors up

Daniel: What the heck is this (*reading email*)

Goes to the masrani global site, and sees alan's email as registered

Daniel: Ugh, if it helps the investors

Daniel clicks video chat option

Offices

Darius, accept, and we'll move out of our way

Alan accepts

Daniel: Hello, Dr. Grant

Alan: Hello, Daniel, is it?

Daniel: Great to have you here, you, dr. sattler, and dr. malcolm are somewhat legends around here

Alan: Well that's great to know, so what exactly do you guys do here?

Daniel: We... We clone dinosaurs to use as attractions in our various facilities around the world. Our most prominent which is going to open in a matter of two years is in Chile, followed by the Dolomites, and some more minor stuff in Malta, and dotted around Europe

Alan: So what species do you clone for your parks?

Daniel: We have around twenty six species, some being variants of those on Isla Nublar. Our biggest highlights are Altispinax,

Thalassadromaesus, and a hybrid from 2018 called the indoraptor. We have ongoing testing on another hybr-. You know what, instead of me telling you all of this, you should go to our website, I'll send it to you in the chat.

Daniel, before sending the link, goes to an IP Grabber website, and launches it, with Alan Unaware. Daniel sends the link

Alan (*whispering*): Should we see

Darius (*Whispering*): Sure

Daniel: Sorry, what was that?

Alan: Sorry, I was talking to one of my friends who's staying at my house

Daniel: What city, the backdrop looks beautiful

Alan: I live in LA, that's... just a painting... it looks so real

Daniel sees a Thalassodromeus fly by the window on Alan's floor, and sees it on his own... he figures out what's going on

Alan: There, interestingly, you have lots of species I never knew about that were ever cloned. Dracorex, very inter-

Daniel: Okay Grant we got you. We know what floor you're on, you only have so far, and so long to run. And also, tell Kenji's friends I say Hi!
