

Episode 10: Chaos Breaks Free

Darius: Guys... you might wanna see this

All of the screens on Main Street blink on

Sabrina: Asset out of containment, well clearly

Theresa: So what do we do?

Brooklyn: I have an idea...

Helipad

Pilot: Come on! What are they waiting for, I have somewhere to go

A black silhouette appears in the back, and the camera turns, and the pilot yells HELP!

Monorail

Brooklyn: So... what's the only way on and off the island

Theresa: Besides the very occasional plane, by Boat

Brooklyn: exactly. So what we can do... its get rid of all of the boats

Darius: Then how the heck do we get out of here?

Brooklyn: See, thats the genius part of it. Some of us can stay on the boat, take it a few hundred feet or so from the docks, and sweep it for any living thing, and you guys can just, well, finish ov the boats

Ben: Brooklyn, thats Genius!

Alan: But what if there's anyone still alive on the island

Yasmina: Unlikely, but we can just sweep the island to see if there's anyone still alive

Docks

Sammy: so... how are we getting rid of the boats?

Brooklyn: *(Holds up a stick of dynamite)* Dynamite

Underground Facility

Asset Out Of Containment, Evacuate Immediately

Asset Out Of Containment, Evacuate Immediately

Asset Out Of Containment, Evacuate Immediately

A hand shows up on a desk, all bloodied, and something pulls the person down as they scream, and "Asset Out Of Containment" continues

Monorail Station

Darius: So... where first? We've more or less swept main street, there's no one on the observation post,

Theresa: There's one other place

Ben: Those being?

Theresa: The labs and the tunnels.

The door is about to close, as Darius runs out of it, leaving the others behind

Tunnels

Darius enters the tunnels, and hears a screech, its just a few compies

Darius: Thank god

Darius walks through and realises he's already been through this segment before

Darius: This... is where Brooklyn found the hybrids, if the depot is that way then they have to be this way

Darius runs to the hybrid containment wing, and sees one door blasted open

Darius: E750

Darius, feeling nostalgia, walks into the room, and sees the destroyed vat which contained E750, and found another one of Wu's hard drives

Darius goes to feel one of the Scorpios Rex's quills on the wall

Theresa: Don't

Theresa: I mean thats a very bad idea

Darius: How did you guys even get here?

Yasmina: Didn't you ever think that the scientists who work here can open the doors?

Darius: Okay, I'll give you that

Darius walks out of room e-750 ahead of the others, and sees another one blasted open, W-600, and another, N-601, and another, A-055, and another, J-936, and the final one, P-812, blasted open, with a deafening roar coming from inside

Darius walks into the room, and sees a spinoraptor feeding on something with its head below the desk

Yasmina: Well look at you, you must be some kind of raptor

Theresa: Conconyx actually, Concavenator, Baryonyx Deinocheirus, and some Velociraptor DNA.

Ben walks up with a tranq gun

Darius: Ben, what are you doing?

Ben: Taking it out

Darius: Ben stop, its going to notice us

Ben pushing off darius' arm

Ben: I know what I'm doing, now let go of me

Darius: NO!

Ben pushes himself off, letting the tranq gun hit the desk, spinning a marble towards wu's pen, which rolls onto a needle, which rolls over the desk, onto the conconyx

Ben: Really

Ben leaves his gun behind, as the conconyx jumps over the desk out of the room, and through the tunnels

The campers run up the stairs where brooklyn and sammy went in season 3, and find the door blocked

Theresa: Guys what's happening?

Yasmina: the door's locked

The Conconyx runs by, having not seen the campers, and walks backwards, looking away, and to the right, right at ben

The Conconyx tip-toes to the campers

Yasmina: This might be one of the smartest things on earth, but would it fall for an alarm

Theresa: On my count of three, run

Theresa: One

Theresa: Two

Theresa: Three

Presses the "Manual Emergency" button on the fire alarm, as water pours down, and the conconyx runs up the stairs ignoring the campers trying to destroy the alarm

Yasmina: go, go, go!

Rain pours through the tunnels as the alarm stops, and the spinoraptor runs down the tunnels and slips, and the campers go down another intersection, and the conconyx goes the wrong way

Darius: Phew

Above the PhasoTech Facility

Daniel: No, we are not ready for opening, we need the final three batches of creatures. Four Days should be enough, we better not have to push back the release date (*As the camera zooms through the hexagonal glass roof, through the observatory, and through the meeting rooms, and into Daniel's office, as we see his hand put down the phone*)

Knock

Daniel: Just come in

Samuel: We have... a problem

Daniel: WHAT! Investors are already pulling out, what could possibly go worse

Samuel: (*Shows tablet screen*) This. Evacuate immediately... but nothing is wrong on nublax, unless

Daniel: Gottem'

Nublax Docks

Brooklyn: C'mon guys, we need to get dynamite from the docks to these ships asap

Sabrina: It would be splendid if you could assist in the process

Brooklyn: What was that?

Sabrina: Ugh

Screech in the forest

Sammy: What was that?

Sabrina: No, no, no, no, no!

Alan: What now, another killer dinosaur on the loose
Sabrina: Precisely, this one is part Therezinosaurus, part
Rugops, we call it the Theresarchus
Brooklyn: Well thats fitting

*One claw pierces through the foliage, and another, and another,
until an Abelisaurid face with feathers pokes its way through
and lets out a roar*

*It runs towards Sammy, and with its claws as sammy runs, it
snatches Sammy's pocket, and has a hold on her*

Sabrina: Over here!

*Sabrina waves a Stick of Potassium Dynamite, and runs towards
the end of the dock, with the Theresarchus following her
closely, letting go of sammy*

*Sabrina throws the stick into the water, exploding water all
over the Theresarchus, when the splash ends, its nowhere to be
seen*

Sabrina: It swims

Tunnels

Theresa: There's a facility near the old camp cretaceous, there
could still be people there

Camp Cretaceous

Ben: Jeez, talk about Nostalgia

Theresa: Come on, this way

Ben looks down, and sees some of Bumpy's footprints

Theresa: That one. We saw her around the camp for months on end,
always waiting, Bumpy was so sure after Muerta you would come
back for her

Yasmina: How do you know her name?

Theresa: Trees, there are a ridiculous amount of tree carvings
here

Inside the facility

Darius: Hello?

Yasmina turns the lights on

Yasmina: Much better

Theresa: There's... no one here

Ben: You know why? Because of your little projects. Everyone is gone, and now we need to get off of this island, now

All of the campers running back and into the tunnels

Docks

Brooklyn: We have to go tell the others now

Sammy: What about the dynamite???

Sabrina: We have enough

Booklyn, Sabrina, Sammy, and Alan running with their flashlights, only to see the the six doors broken down

Brooklyn: Oh no, this is bad, they all escaped

Ben: Guys?

Darius: We need to go now, all of the hybrids are gone as you can most likely see

Theresa: Brooklyn, go take the boat a few hundred yards away

Alan: We can handle the rest of the dynamite

The group carry the last load of dynamite, and place it onto the boats, as one more screech is heard, from the boat

The spinoraptor jumps from the boat, cornering the group, and a Stegoceratops appears from the other boat, facing down the Spinoraptor. The Theresarchus climbs out of the water with a screech, as a iguanodontid hybrid (the JWTG Iguanosuchus) and the "Thick Skull" from episode 9 (Diopachyus, one of the CCS3 Concepts) whilst gnawing at eachother run into the battle

Darius: Oh no

As the campers run out of the way

The Spinoraptor runs at the Theresarchus, to which the other knocks onto the boat, the spinoraptor slowly gets up. The Iguanosuchus runs towards the Theresarchus which tries to kill the Iguanosuchus, as the Stegoceratops runs into both, stunning them. The Diopachyus runs onto the ship as the Spinoraptor jumps on its back. The Diopachyus shakes, and the spinoraptor falls

off, it runs back and slams into the spinoraptor, killing it as the camera turns away.

The Diopachyus runs towards the Theresarchus, as the latter plans to stab it in the neck. In Slo-Mo, the Diopachyus lowers its head, as the Theresarchus' claws hit the dome of the head and snap off.

The Iguanosuchus runs at the Stegoceratops with its jaws, attempting to snap off the Stegoceratops' horns, the stegoceratops catches the Iguanosuchus mid air, and throws it onto the pavement, the Iguanosuchus tries to get up

The Diopachyus charges towards the Stegoceratops, and strikes it in the side, unleashing blood. The iguanosuchus comes up, and with its claws outward stabs the Theresarchus, killing it. The Diopachyus charges at it again, but the Stegoceratops leans down and catches it in its horns, throwing it into the water

The screen dimmens, and rain starts to pour, as the Stegoceratops launches the first attack at the Iguanosuchus, which it deflects, and tries to pierce the skin with its thumb spikes. The Stegoceratops counters and throws it onto the ground. It gets back up and slams the Stegoceratops before climbing onto its back, and stabbing its left eye, and throwing it into the water

It turns around to see the campers. It roars at them, then runs away into the forest. Never to be seen again

Brooklyn: Well, that was grim

Brooklyn is in the boat, moving it from shore, as the campers are on the dock, ready to light the boats

The campers lay the string for the Dynamite

Theresa: I'm, not coming

Sabrina: Come on, you're being childish

Theresa: I'm not letting my life's work go down a hole like it did in 2018, nearly forgotten. I've dedicated the last 6 years to this and I'm not letting it fade to nothing,

Ben: If she wants to... thats her call. I almost did a few years ago, she'll do it if she wants

All the campers hug theresa, then she walks towards the monorail station

Doors Close

Sammy: So, are y'all ready for the biggest light show ever?

The campers jump into the water, with the string connected to all the boats, and Sammy has a match

Alan (As Sammy light the match) What's that?

Zooms in on a rainbow-ish color near a boat

Darius swims over, sammy says "Almost Got this guys!"

Darius: Oh no... thats Oil, Sammy DON'

Darius gets cut off as sammy lights the match and it hits the string

The camera follows the string as the fires ignite, and it goes to the ship on the right, and it blows up, aswell as the other two on the right, and the campers duck, the audio of the other 3 exploding can be heard

The campers swim away underwater, under the docks, as they surface, and see a completely destroyed oil pipe..

Overhead shot

The oil pipes explode all along the docks, up the Monorail station, and accelerate and move all over the island in a "The Gate's merge" style, with Vecna's Grandfather clock music. One goes through the tunnels, as the tops explode at a ridiculous rate, another goes up to mount Sibona, as the remnants of the Observation post fall into the volcano. Another one goes down to the canal and explodes all through the canal, as the boardwalk collapses into the Mosasaurus lagoon. One goes under and on the edges of main street, through the buildings, and they all blow up, as the Innovation center collapses in on itself. Three major pipes, going up main street, going through the tunnels, and going around the perimeter meet at the Camp Cretaceous area, as the oil pops out and the place explodes, and the Season 2-3 camp collapses in a slow, painful shot

Monorail Hub (Season 1 location)

The oil pipes explode to the monorail hub, and go onto the other tracks, one goes on the track that Theresa takes, and quickly zooms its way to Theresa's monorail. Theresa, vaguely unaware takes her headphones off, and sees the tracks collapse in front of her very eyes, as the tracks derail, and the screen cuts to black

Post credit scene

PhasoTech San Francisco

PhasoTech Operative: Boss, are you sure that we shouldn't sedate the animals, they're getting feisty, I don't think they'll be particularly happy come Wednesday

Daniel: (On Phone) Don't worry, everything will go as planned

Screen cuts to black
