

DIY: Sammy's Mask

What you'll need:

- Yellow or white printer paper
- Printer
- Cardboard surface (8.5x11" minimum)
- Glue stick
- Scissors
- A roll of ribbon or string

Step 1: Print out the provided picture of Sammy's mask.

If you didn't have yellow printer paper, you can use a yellow pencil to add color!

Step 2: Flip Sammy's mask over and apply your glue all over the back side.

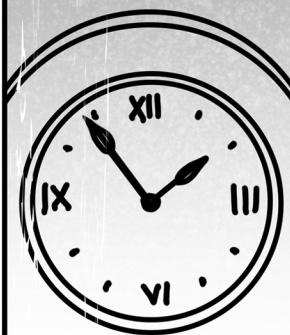

Step 3: Glue the back of Sammy's mask to your cardboard surface.

Pat the whole surface firmly to make sure every inch of it is glued down!

Wait a few minutes for the glue to dry.

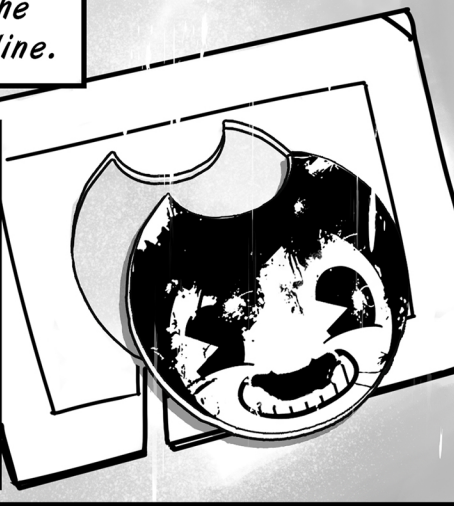

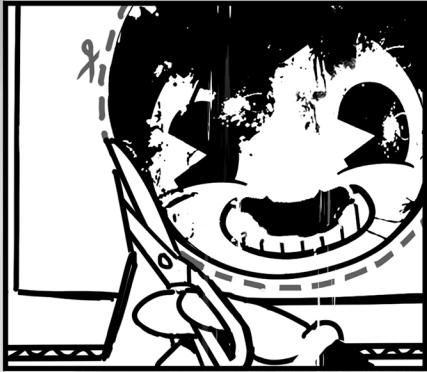

For the next part, you'll need to grab the scissors.

You may need an adult's permission before using scissors. Don't hesitate to ask them for help!

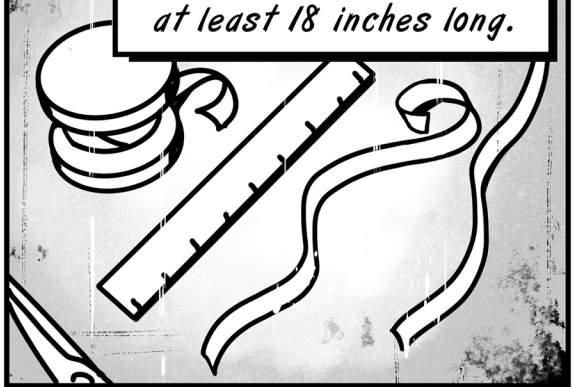

Step 4: Carefully cut out the mask following the dotted line.

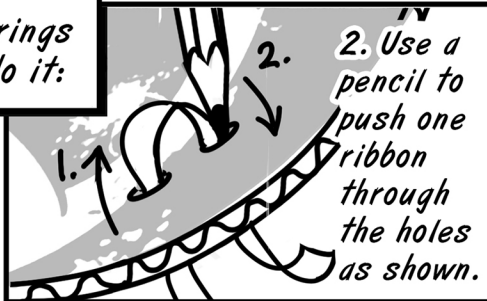

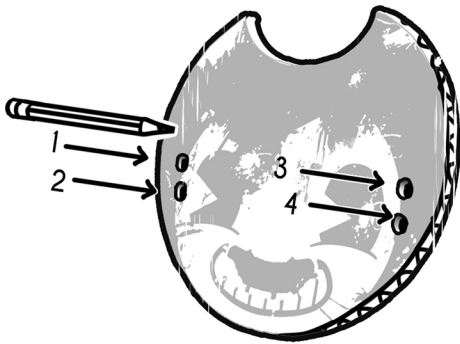

Step 5: Cut out two pieces of ribbon or string.

Each piece should be at least 18 inches long.

Step 6: It's time to attach the strings to your mask. Here's one way to do it:

1. Use a pencil to poke two small holes on each side, about one inch from the edge of the mask.

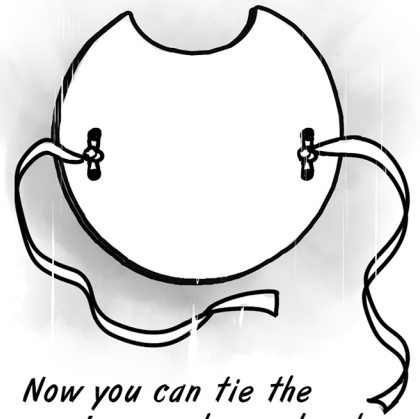

2. Use a pencil to push one ribbon through the holes as shown.

3. Tie the ribbon to the mask with a double knot.

4. Repeat on the other side with the 2nd ribbon.

Now you can tie the mask around your head and adjust it as needed.

If you don't want to make holes in your mask you can attach the ribbons with hot glue or duck tape.

If you're not sure, check with an adult to see what you could use.

The last step is optional. You can poke in some eye holes for you to see through.

And there you go!
You've made Sammy's mask!

THE END
