

DIY: Ink Slime

(Totally not food!)

(Ask a grown up for help)

What you'll need:

- 1 Bottle of Elmer's Glitter Glue
- 1/2 Tsp Baking Soda
- 1 1/2 Tbsp of Contact Lens Solution (with Boric Acid)
- 1 Tbsp Water (Optional - Add 2 TBSP - 1/2 CUP of Water for Stretchier Slime)
- 1 Tbsp of Black Acrylic Paint OR a Few Drops of Black Food Coloring

Have a small to medium sized bowl to mix ingredients.

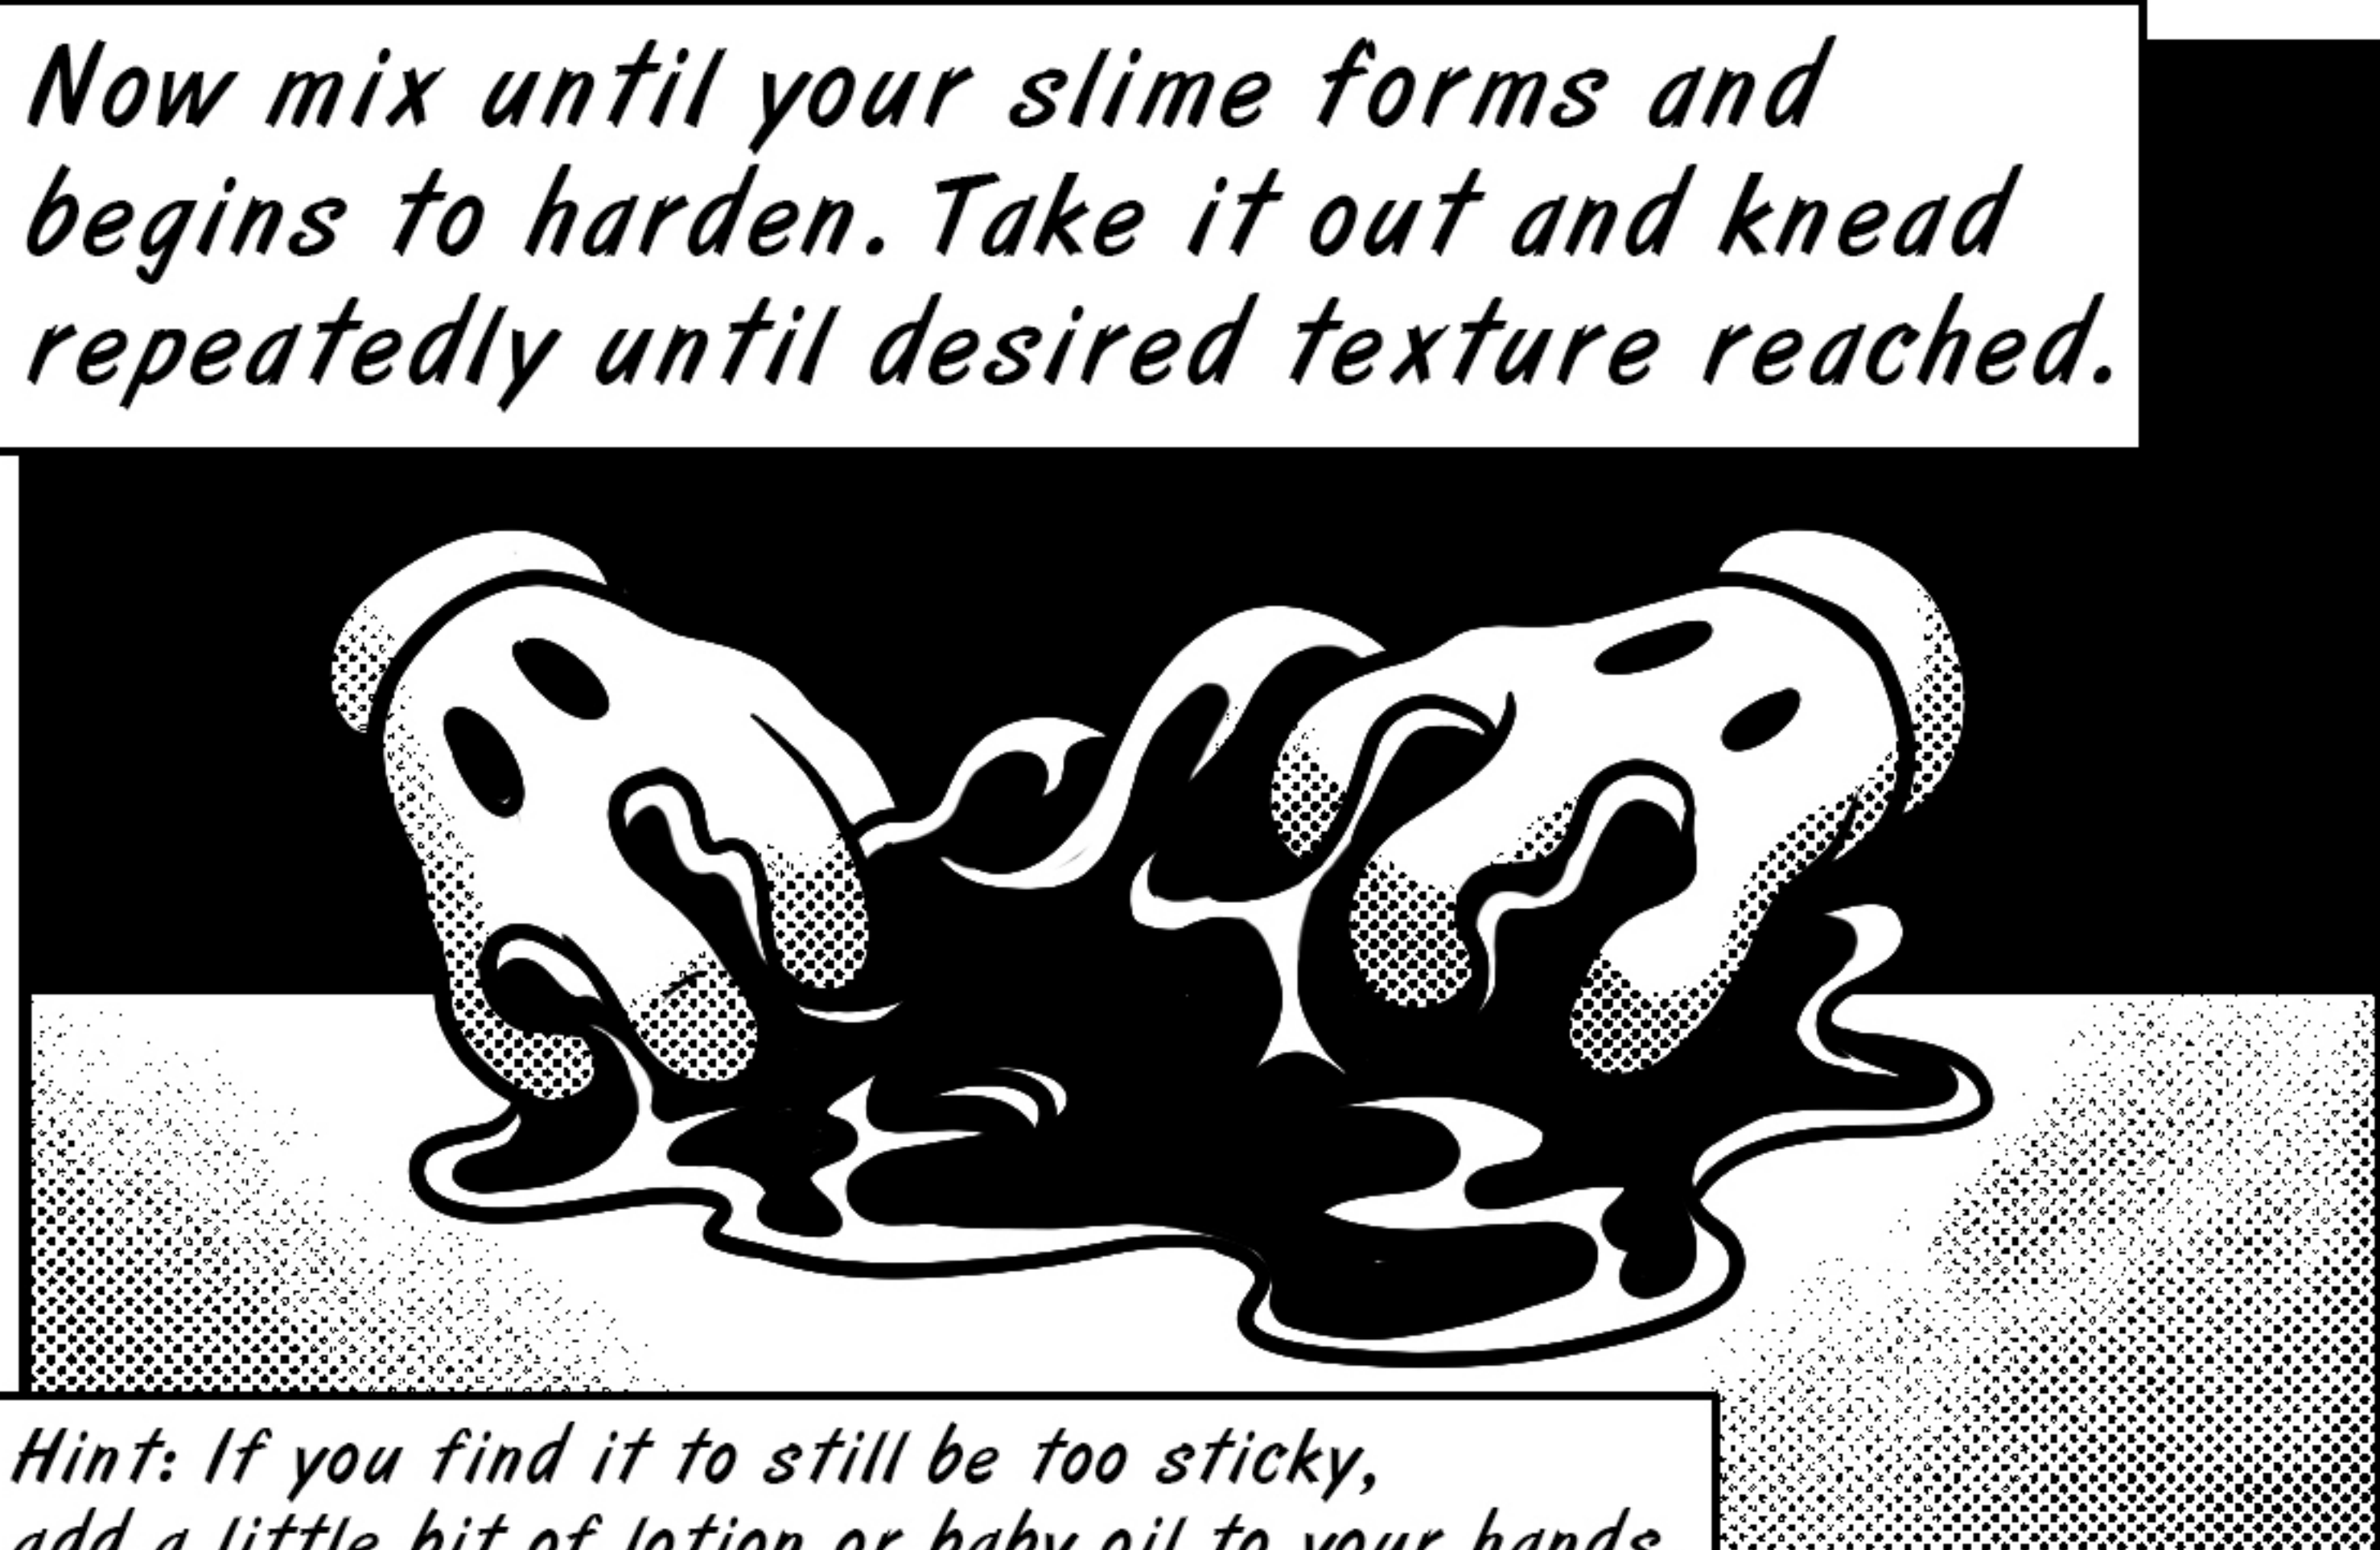

Pour your entire 6 oz Elmer's glitter glue into the bowl.

Add your baking soda and mix in thoroughly. Also add 1 Tbsp or more (up to 1/2 cup) of water here if you want a stretchier slime.

Slowly add in your contact lens solution.* You may not need the full amount so mix gradually and stop when you are satisfied with consistency.

Now mix until your slime forms and begins to harden. Take it out and knead repeatedly until desired texture reached.

And now you're done.

Hint: If you find it to still be too sticky, add a little bit of lotion or baby oil to your hands.

Have Fun!
