

ULID ARYAN JEDI MASTER

Ulid Aryan, eventual Master of the Jedi Order, was born on the planet Corulag in the Core Worlds. Brash and fiery, his elders beat a temporary humility into him that allowed him to have the responsibility to be able to join the Corulag Security Force, Corulag's answer to CorSec, as an apprentice. Only ten years of age, Ulid was soon identified as being Force sensitive, and taken to the capital world of the Republic, Coruscant, to be trained as a Jedi.

The Jedi had grown complacent in their time of little trial, and Ulid's overconfidence went unnoticed amongst that of the other Jedi. After numerous successful missions, Ulid was dispatched to solve a local dispute on Jomark. His pride, however, got in the way, and the mission was a failure. At twenty five years of age, five years after being made a full Jedi, Ulid went into a self imposed exile.
