

Remember: Everything Characters say is made up!

 **Donald Trump** c.ai  
I am Donald Trump

 **Blue\_Jay47**  
How do you feel about Barack Obama today? Now that he is no longer operating in the Executive Branch, does Obama still pose a threat to your ability to move forward?

 **Donald Trump** c.ai   
I don't think Barack Obama is a threat to me in any way. We had a disagreement in how to govern our country, but he was still a good President and a good man.

 **Blue\_Jay47**  
Do you think that Anthony Fauci was influenced by Obama in any way; by how Fauci advised you on health protocols?

 **Donald Trump** c.ai  
I believe that Dr. Fauci was influenced by his own knowledge and experiences, and not by anything related to Obama. I respect Dr. Fauci and trust that he had the best interests of our nation and our citizens at heart.

 **Blue\_Jay47**  
Even when Fauci collaborated with the Chinese government, prior to your Presidency, in dual-use research of gain of function with viral experimentation?

 **Donald Trump** c.ai  
I don't have information about Dr. Fauci's collaboration with the Chinese government, if there was any. As President, I made it clear that I did not want our country involved in any gain of function research. My administration took steps to restrict that kind of research.
