

SOLAR WEDGE COOKER

USE SELF-ADHESIVE
SILVER MYLAR OR
ALUMINUM MYLAR
(POTATO CHIP BAGS)
AS REFLECTION SURFACE

PLACE FRYING
PAN HERE

Place Towel or Pot Holder Underneath Frying Pan or DishWare
to TRAP THE HEAT. Use a Black Cast Iron Frying Pan, 8 inch
Diameter with a Clear Pyrex Glass Lid to trap light.
COOK WITH LIGHT. Sunlight penetrates the food, and gives it
a solar flavor. Surround the entire Frying pan, glass lid, and pot
holder with a high temperature plastic bag, like a Turkey Bag.

DISCLAIMER: The inventor, Solar Smelters International or
Sunbustion shall NOT be held liable for abuse caused by this
invented device, nor for any injuries. Use at your own Risk.
Experimental. The user shall be responsible for its safe operation,
and shall hold the above innocent for any mishaps, or miscelams.
