

## 20190917 Model of Mongoloids

Viktor Nonong Medrano

In my photograph is my model of Mongoloids. The two corns are the warm-adapted Paleo-Mongoloids, which have two variants, Amerindians (or Amerindoids or Native Indians) and Austronesians (also known as Malayo-Polynesians or Southern Mongoloids or Sundadonts). Meanwhile, the apple pear is the more squinty-eyed, cold-adapted Neo-Mongoloids (or East Asians or Sinodonts or Northern Mongoloids, including Eskimos).
