

20191202 **Apes and Machines**
Viktoro Medrano

Maybe, the future on Earth will have two intelligent kinds, the continuing saga of the apes as humanity and the exploding intelligence of machines. Hopefully, the planet does not get too polluted from industry or war to the point that there will be no continuing. Maybe Machine Intelligence will cleanse the Earth. Ay yes, the Machine will be Salvation! (Maybe as hybrids, some humans will have machine parts.)
