

20191017 **Retrocommunication**

Viktor Nonong Medrano

I seem to be able to communicate, just by thinking or talking, to actors and other people in prerecorded television programs or movies, as well as in realtime broadcasts as news or sports events. Now, I opine that the past cannot know the future. I sometimes think that the effect is due to tachyonic or psychonic particles or waves that my "telepathy" could "piggyback."

Tachyons or psychons theoretically could travel faster than light, so that they could travel backwards in time. So, theoretically, my thoughts could also travel backwards in time. Recently, I have been thinking that the whole conversations could be *trickery* by higher consciousness beings. They make it seem that people in the past can have memories about the future. The actors and others maybe become like *puppets, marionettes*. The conversations could be special *trickery*. I still wonder. Another possibility is that this world that I perceive is a big *illusion*. Maybe, this world is like a special *menagerie*. Will the truth reveal itself?
